Control

- A Brazilian information and documentation company;
- Funded in 1992 in Porto Alegre;
- Strong presence in Rio Grande do Sul State;
- Operates all over the country and abroad.

IsisHome

- Web Hosting Service;
- Started in 2007;
- Dedicated to CDS/Isis users.

IsisHome

- It has been created because:
 - CDS/Isis is unknown by regular hosting providers;
 - Most providers forbid the use of CGI applications (like BIREME's WWWIsis);
 - It is very hard to obtain executable permissions on CGI folders;
 - Also, there is no technical support to help CDS/Isis users.

IsisHome

- Nowadays:
 - Control is using it to host their own applications that use CDS/Isis databases;
 - The hosting service is offered to all CDS/Isis users – in Brazil and abroad.

Hosting as a solution

- Hiring IsisHome Hosting Service the customer has:
 - A domain area with permission to run CGI;
 - Preinstalled copy of WWWIsis;
 - An email with all the information needed to develop scripts;
 - Technical Support specialized in CDS/Isis and WWWIsis;
 - Control Panel as a graphic interface to manage the site.
